ERATA

Does not appear to be malicious in intent, from reading the enlistment app on their site appears player found a group that offers similar style on a more agreeable timeslot and that is all. --- That said what is concerning is the love party in the farewell post, and then going against that to join up someplace else admittedly this action was not taken for almost a month, as his registration date on their forums is 16-01-2010. As this was a general discharge at request --- recommend that this information be noted to his file, in case at later point he wishes to entertain coming back to the Cav only.
